**Frog Street Pre-K Implementation Training:**

In this session, teachers will investigate components of the curriculum by content area and link application of use in instruction to state standards. Daily, intentional lesson sequence will be reviewed and modeled with a particular emphasis on early literacy in whole group, small group and learning centers.

Daily, sequenced math lessons for small group and learning centers will be modeled with an emphasis on opportunities for practicing skills and discussing mathematics in developmentally appropriate ways. Teachers will review the content area skills integrated into the daily lessons (science, social studies, creative art, physical development and technology). Ongoing assessment opportunities and differentiated instruction will be reviewed through the lesson modeling.

Application of learning will be approached through group work to model key lessons with fidelity of instruction. Teachers will review sample scheduling, online resources for teachers and parents, and reflect on their needs.

Materials used in the training will be provided by Frog Street Press. Each participant is asked to bring their *Welcome to Frog Street Pre-K Guide* and *Teacher Guide 1*.
